vishalshingate97@gmail.com | +917350534839 | LinkedIn

## EDUCATION

### SAVITRIBAI PHULE

### PUNE UNIVERSITY

### BE IN COMPUTER ENGG

June 2020 | Pune, MH

CGPA: 7.49

## LINKS

Github:// [vishalshingate](#)

Leetcode:// [vishalshingate](#)

## TECHNICAL SKILLS

### PROGRAMMING LANGUAGES:

Java, JavaScript, SQL, T-SQL

### BACKEND & FRAMEWORKS:

Spring, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful Web Services, Microservices Architecture, Spring WebFlux

### API & INTEGRATION:

API Gateway, Service Discovery, REST API Design, WebSocket Communication, API Versioning, API Rate Limiting

### MESSAGING & CACHING:

Apache Kafka (Event-Driven Architecture, Asynchronous Processing), Redis (Distributed Caching)

### DATABASES & DATA MANAGEMENT:

PostgreSQL, MySQL, SQL, T-SQL, Database Design, Query Optimization, Transactions, Indexing, Flyway Database Migrations

### SECURITY & AUTHENTICATION:

JWT, OAuth 2.0, Spring Security, Token-Based Authentication, Role-Based Access Control (RBAC)

### OBSERVABILITY & MONITORING:

OpenTelemetry, Zipkin, Distributed Tracing, Metrics & Logging

### CONCURRENCY & PERFORMANCE:

Multithreading, Concurrency Control, Deadlock Prevention, JVM Internals, Garbage Collection, JMC, JFR, Performance Tuning

### CLOUD & DEVOPS:

Microsoft Azure, Docker, Kubernetes, Load Balancers, CI/CD Pipelines, Jenkins

### TOOLS & PRACTICES:

Git, Maven, Gradle, Postman, Agile/Scrum, Code Reviews, Software Development Lifecycle

## SOFT SKILLS

### ANALYTICAL THINKING:

Enhanced troubleshooting to resolve complex back-end integration challenges

### COLLABORATION:

Collaborated with cross-functional teams to ensure timely project completion.

### ADAPTABILITY AND RESILIENCE:

Ability to remain calm and composed in high-pressure situations, ensuring effective decision-making.

## EXPERIENCE

### PTC | SOFTWARE SPECIALIST

June 2022 - Present | Pune, MH

- Enhanced the IIoT platform in collaboration with PTC's ThingWorx Core R&D team, driving critical updates to improve system resilience and stability.
- Designed and integrated Kafka-based asynchronous processing to enable high-throughput, fault-tolerant workflows in a distributed IIoT platform, supporting scalable and reliable data processing.
- Designed and implemented Redis-based caching for high-traffic REST APIs, reducing database load and improving API response time by 40% while supporting low-latency request handling.
- Implemented distributed tracing using OpenTelemetry and Zipkin to achieve end-to-end visibility across microservices, significantly reducing production debugging and incident resolution time.
- Led the redesign of critical locking and concurrency mechanisms by introducing a deadlock-free algorithm, significantly improving system stability and throughput under concurrent workloads.
- Performed deep JVM and application performance analysis using JMC and JFR, identifying bottlenecks and optimizing APIs to achieve 30% improvement in execution time and response latency.
- Implemented OAuth management for SAP connectors, enabling seamless authentication and reducing the need for multiple licenses, significantly lowering costs for customers.
- Owned production issues end-to-end by performing root-cause analysis, delivering real-time mitigations, and implementing long-term fixes, reducing customer downtime by 60%.

### ACCENTURE | APPLICATION DEVELOPMENT ANALYST

Jan 2021 - June 2022 | Pune, MH

- Collaborated with insurance industry stakeholders to design and implement automation solutions, streamlining internal workflows and enhancing operational efficiency.
- Designed and implemented state-specific rules for an insurance project, adapting to regulatory requirements and tailoring solutions to meet diverse client needs.
- Modified and optimized implementation details based on client-specific requirements, ensuring compliance and enhancing system flexibility.

### SSP TECHNOLOGIES | SOFTWARE ENGINEERING INTERN

Nov 2019 - Apr 2020 | Pune, MH

- Contributed to the development of software modules while designing and implementing JUnit test cases to validate functionality.
- Gained hands-on experience with tools, technologies, and frameworks such as Java, SQL, and Software Development Lifecycle (SDLC) processes, enhancing technical proficiency and practical understanding of software development practices.

## AWARDS

|      |                         |                                                      |
|------|-------------------------|------------------------------------------------------|
| 2025 | Customer First          | Delivered feature critical for customer.             |
| 2025 | Brains, Passion & Fun   | Awarded for great analytical skill.                  |
| 2024 | Excellence & Innovation | Documentation and Investigation of Monitoring tools. |
| 2023 | PTC For ALL             | Awarded for excellent performance.                   |
